Make a Difference...

Be a part of a national grassroots effort by joining our network of volunteers striving to empower others and make the world a more accessible place.

AMBUCS members are committed to performing valuable civic service and improving their communities. Some of our programs include home ramp building for people in wheel chairs and the funding of college scholarships for therapists. One of our most successful programs in recent years has been the distribution of the AmTryke® therapeutic tricycle.

...In Order To Improve The World Around You!

Service to others is what AMBUCS is all about. AMBUCS provides fun, innovative service opportunities for people who want to help their community but do not necessarily have a lot of time to do so.

By working together, AMBUCS volunteers combine their individual strengths and maximize their

spare time. As you work with volunteers, you'll contribute to chapter activities and goals, and you'll learn new skills that can pay lasting dividends in your personal and professional life. Plus, you'll have the opportunity to make valuable contacts and develop leadership skills.

By Giving the Gift of Mobility & Independence!

Our leading programs is the donation of AmTryke® therapeutic tricycles.

All across the nation, AMBUCS chapters are raising funds to donate AmTrykes to riders who are unable to operate traditional bikes.

For more than a decade, these specially designed cycles have provided therapeutic benefits to both children and adults, while enhancing their quality of life

AmTrykes can be hand and/or foot-powered and will accommodate riders of all sizes and ages. They help improve fitness, coordination, increase self-esteem and, most importantly, are very fun to ride!

Many AMBUCS chapters also are active in building wheelchair ramps to make homes accessible and creating universal playgrounds that can be used by all children regardless of disability. If there's a way to help someone gain more mobility and independence in their lives, AMBUCS is always eager to help.

AmTrykes allow riders to feel balanced & secure

Our programs are able to enhance the quality of life of people with disabilities by providing meaningful programs not funded by government or insurance

Supporting Tomorrow's Therapists Today

Our organization has long believed that a great way to serve people with disabilities is to support the future generations of therapists. To date, AMBUCS has provided over \$7.6 million to educate physical and occupational therapists, speech language pathologists and hearing audiologists. One scholarship can go a long way, as the clinical practitioner spends a lifetime working with the community of people with disabilities. The AMBUCS Scholars program represent the largest single private source of educational grants for therapists in America.
